EDUCATION

Master of Computer Applications (MCA)
APJ Abdul Kalam Technology University, College of Engineering, Trivandrum – 2022 (89.2%)

Bachelor of Computer Applications (BCA)
Kerala University, National College of Arts and Science, Manacaud – 2020 (87.13%)

XII (Computer Science)
CBSE, Infant Jesus Central School, Kuravankonam – 2017

X (General)
CBSE, Infant Jesus Central School, Kuravankonam – 2015

CORE TECHNICAL SKILLS

- **Testing Tools:** Selenium WebDriver, Cucumber (BDD), TestNG, JUnit, Appium, REST Assured, Postman, Karate
- **Programming Languages:** Java, Python, C, C++
- **DevOps Tools:** Azure DevOps, Git, Maven, Jenkins
- **Web Technologies:** HTML, JavaScript, PHP
- **Frameworks:** Page Object Model (POM),

PROFILE

MCA graduate and Software Engineer with **three years of experience** in enterprise software quality engineering and test automation.Experienced in building and maintaining automation frameworks using Java, Selenium WebDriver, Cucumber BDD, and TestNG to improve testing efficiency and product quality.Skilled in API testing with Postman and REST Assured, and working within Agile development environments. Strong knowledge of SDLC, regression testing, CI/CD workflows using Git and Maven, and defect tracking using Azure DevOps and Jira. Proven ability to collaborate with development teams and deliver reliable, high-quality software releases.Known for strong analytical thinking, attention to detail, and the ability to collaborate effectively with cross-functional teams to deliver reliable and high-quality software solutions. **Currently based in Dubai and available for immediate joining.**

WORK EXPERIENCE

UST ,Trivandrum, India May 2023–Dec 2025
Automation Engineer/Tester

- Designed and automated test cases using Selenium WebDriver with Java, improving test coverage and efficiency.
- Built and maintained Cucumber BDD frameworks, writing Gherkin scenarios and step definitions.
- Performed API testing using Postman and REST Assured to validate backend services.
- Executed functional, regression, and integration testing for web and mobile applications.
- Collaborated with developers, business analysts, and product owners to ensure testability and risk coverage.
- Actively participated in defect triage meetings, providing detailed test reports and insights.
- Validated new feature deployments post-release through manual and automated verification.
- Mobile automation exposure using Appium, supported by formal training and a solid understanding of mobile automation concepts, with the ability to adopt and scale quickly as required
- Implemented Allure and Extent Reports to provide detailed automation test reporting and insights

Data-Driven Framework, Hybrid Framework, Agile Scrum

- **Database:** SQL, Database Validation

CERTIFICATIONS

GitHub Copilot – Udemy
Certificate of Completion,GitHub Copilot Beginner to Pro- AI for coding and developing

ADDITIONAL DETAILS

Nationality: Indian

Gender: Female

Languages Known: English, Hindi, Malayalam

Location: Dubai

Availability: Immediate Joining

- Documented test plans, test executions, and defect reports in Azure DevOps, ensuring end-to-end traceability and reporting accuracy

ACHIEVEMENTS

- 2nd Rank in BCA, Kerala University (2017–2020)

KEY PROJECT EXPERIENCE

- **Project: UST QE360 – Enterprise Quality Engineering Platform**
  -Part of the Quality Engineering team responsible for ensuring functional stability and regression reliability of UST QE360, an enterprise-level AI-driven test automation and analytics platform. The project focuses on validating the platform's end-to-end features across web and API layers, ensuring robust performance and accuracy of its automation modules.

- **GenAI Integration Exposure**
  Worked on an enterprise AI-driven automation and analytics platform (UST QE360), validating AI-assisted modules and using LLM-based tools to enhance debugging and code design workflows

ACADEMIC PROJECTS

- **Face Recognition Based Attendance Monitoring System**
  – Python-based facial recognition system for automated attendance tracking in educational institutions, improving accuracy and reducing manual effort.

- **Library Management System**
  – PHP-based project for managing and tracking daily library operations such as issuing, returning, and calculating dues.

- **Payroll Management System**
  – Automated salary and attendance calculation in PHP.

- **Road Safety System**
  – Accident-prone zone alert system.PHP-based project that notifies users when entering high-risk areas and provides safety precautions.
